

Professional Tile and Grout Cleaner (D456)

The first step for sparkling clean tile and grout

FOR PROFESSIONAL USE ONLY

Powerful alkaline hard surface flooring, tile and grout cleaner

APPLICATION: Hard Surface Care

DESCRIPTION

Professional Tile and Grout Cleaner is formulated for easy cleaning of ceramic tile surfaces and grout using hard surface cleaning tools. Use this potent, low-foaming, high alkaline tile and grout cleaner as the first step for sparkling clean hard surface flooring such as manufactured tile, grout and some VCT, vinyl, concrete and some VCT and natural stone surfaces. Industrial strength detergents and surfactants added for improved penetration and cleaning power. This water-based product can be used on residential or commercial floors and other surfaces, indoors or outdoors. Penetrates grout to loosen and break down greasy, oily soils and dirt. Professional Tile and Grout Cleaner cleans without strong acids or etching.

FEATURES

- Designed for use with a truckmount or portable and hard surface cleaning tools
- Penetrates grout to remove oils, soil, and spots
- No strong acids or etching

WHERE TO USE: Use to clean manufactured tile, grout, vinyl, concrete and some VCT and natural stone surfaces.

USE DILUTION: 14 oz. / gallon

USE DIRECTIONS:

Pre-test: Recommended for use on ceramic tile surfaces and grout. Pre-test process in an inconspicuous location. Check for weakened or damaged grout which may be affected by high pressure cleaning. Avoid spraying onto wood, aluminum, stain-resistant carpets, upholstery fabrics or other delicate surfaces. Use with caution near painted surfaces, plastics, "no-wax" resilient floors and soft natural stone.

Mixing: Mix 14 ounces with water to make one gallon.

Cleaning:

Use an electric sprayer or pump sprayer to apply to grout lines and tile. Allow 5-10 minutes dwell time depending on soil. Pressure clean surface with hot water using a truckmount or portable extractor. Use an edging tool for floor edges, countertops and walls. Use a hard surface cleaning tool for floor areas. Operate truckmount at 800-1,000 psi for ceramic tile cleaning. Pick up any remaining water with extraction tool or clean terry towel. Allow surface and grout to dry before allowing traffic.

COVERAGE: Makes up to 9 ready-to-use gallons. One gallon of ready-to-use solution will clean approximately 200 - 400 square feet, depending on soil level, tile type and width of grout lines.

USAGE TIPS:

- CAUTION: Floor is slippery when wet.
- Pressure clean edges first with an edging tool, then clean the rest of the floor with a hard surface cleaning tool.
- Pre-test before using on natural stone
- Prochem's Professional Grout Sealer (D460) is recommended for sealing ceramic tile grout after cleaning with this process.
- Boost your solution with Citrus Pro for even better cleaning results!
