

**PROCHEM.**

## Liquid Pro

The soils found on upholstery differ from those found on carpets, and the use of products formulated specifically for upholstery cleaning is necessary. Liquid Pro extraction rinse is ultra-concentrated and economical, and is an ideal second step in the two-step hot water extraction upholstery cleaning process to remove soils suspended by Prochem's Upholstery Prespray. This two-step upholstery cleaning system is formulated to outperform other synthetic fabric cleaning agents on the market!
