

PROCHEM.

One-Step Red Rescue

Contains a synergistic combination of active chemical reducers and other premium-grade ingredients to quickly and effectively transform synthetic dyes and make them disappear forever! Use to combat tough synthetic dye stains found in colored sports drinks, children's beverages, food products and sauces, cough medicine, mouthwash and more. Red Rescue is conveniently ready-to-use: no mixing required, plus it works faster and has a longer-lasting shelf life than the competition.

Review these [Tech Tips](#) for expert guidance on spot and stain removal.
