

CDV Inline Filter Box

This high capacity in-line filtration system captures carpet fibers and other debris during carpet cleaning and flood extraction before it reaches your truckmount tank. Unlike other systems that quickly plug with debris and cause suction loss, the CDV is engineered to maximize filtration and vacuum flow.

FEATURES

- Durable polyethylene rotomolded housing
- Removable polycarbonate window – monitor cleaning progress
- Stainless steel filter
- Dual 2.5-inch and 2-inch extractor-side connections for maximum vacuum flow
- Two 2-inch cleaning side inlets let you clean with two wands or other tools simultaneously

SIZES ▪ OPTIONS

- **102584 (68-134S):** One unit

SPECIFICATIONS

- **Dimensions (H × D × W):** 9.5 × 20 × 18 in. | 24.1 × 50.8 × 45.7 cm
- **Vacuum hose connections:** Extractor side: 2 in. and 2.5 in. outlets. Cleaning side: two 2 in. inlets.
- **Construction:** Rotomolded polyethylene housing with integrated handle, removable polycarbonate observation window, and stainless steel filter box.
