

# Spot and Stain Kit (Calif. compliant) User's Guide

## GENERAL SPOTTING INSTRUCTIONS:

- For dye stains: Attempt normal cleaning procedures on Spots and Stains before attempting spot removal
- Pigment stains should be pre-treated prior to cleaning
- Pre-test all products in an inconspicuous area for colorfastness and fabric stability before use.
- Scrape off excess with plastic utensil or spotting spatula.
- Do not apply directly to carpeting or upholstery. Apply product to a towel, then daub on to spot or stain.
- Allow product to dwell on surface for 5–15 minutes, then blot. Do not rub; rubbing can cause damage to fibers.
- For large spots, work from the outside toward the center.
- Rinse extract the area if extraction equipment is available.
- Establish good drying conditions

Reorder Number	Product name / Description	Type of spot
B121	<b>ProSpotter.</b> General purpose spotter. Neutral pH. Water based	Beer, candy, honey, syrup, liquor, water-based spots.
E840	<b>Citrus Gel.</b> Thickened solvent-based spotter reduces tendency to soak into carpet backing.	Asphalt, tar, oil, auto grease, bacon, gravy, fatty oils, gum, ink, liquor, latex paint (fresh), body oils, chewing gum.
IXITCS	<b>Ink Exit.</b> Extremely effective ink removal technology. Product will not delaminate carpets and rinses with water.	Ball point ink, permanent marker.
REDXITCS	<b>Red X It.</b> Excellent reducing agent, stain remover for synthetic dyes found in flavored drinks, fruit juice, sports drinks, and more. Not recommended for use on natural fibers	Coffee, tea, cola, berry stains.
RRCS	<b>Rust Remover.</b> Water based acidic formulation removes rust stains from a variety of carpets and fabrics.	Rust, iron oxide, blood residue, metal stains.
B173	<b>Paint, Oil &amp; Grease Remover (POG).</b> Nonvolatile, dry spotter attacks paint, oil and grease shoe polish and oxidized oils.	Paint, oil, grease, margarine, asphalt & tar, rubber marks, varnish spots, glues, nail polish, mascara, cosmetic dyes, lipstick, bug stains.
SECS	<b>Stain Exit.</b> An oxidizing agent particularly effect against natural stains.	Fruit juice, wine, coffee, tea.

*NOTE: Read product labels for complete mixing and use instructions before use. The following cleaning products are referenced in this guide but not included in the Spot and Stain Kit: All Fiber Rinse (B109), Olefin Pre Clean (E827), and Ultracac Trafficlean (S712), and Enz-All (C-EA24).*
