

# One Earth Carpet Cleaner & Rinse

FOR PROFESSIONAL USE ONLY

No Foam • Zero Odor • EcoLogo Certified

## BACKGROUND

**One Earth™ Carpet Cleaner & Rinse** is a general-purpose carpet cleaner for use on water cleanable carpet. The product is quite versatile and can be used in multiple cleaning systems including:

- Prespray
- Rinse Extraction
- Low moisture cleaning

**One Earth Carpet Cleaner & Rinse** is compatible with both portable and truckmount extraction systems. The product includes water conditioning agents and an alkaline builder; it leaves no sticky residues.

Because **One Earth Carpet Cleaner & Rinse** generates no foam, the extraction process is more efficient. Foam interferes with extraction especially in portable equipment. The product has zero volatile organic compounds and no known allergens, so it is ideal for use around sensitive populations.

**One Earth Carpet Cleaner & Rinse** is certified by UL Environmental under the **EcoLogo** soft surface 2795 standard as an environmentally preferable product. It is safe for use on water-cleanable wool.

## USE INSTRUCTIONS

### PREPARATION OF READY TO USE (RTU) SOLUTION

**Dilution instructions for prespray.** For pressure sprayer application: Add 6 ounces of concentrate with enough water to make one gallon of ready to use solution (47 mL/L). (20:1) Use cold tap water.

**Dilution instructions for rinse agent:** Add 2 ounces of concentrate with enough cold water to make one gallon of ready to use solution (16 mL / L). (64:1).

**Dilution instructions for low moisture cleaning processes:** Add 2 ounces of concentrate with enough water to make 1 gallon (64:1). Use cold water.

### CLEANING PROCEDURES - EXTRACTION:

- Preinspect / prequalify / pretreat spots as needed. ~~Be sure to~~ check for the compatibility of the product with the carpet.
- Post wet floor signs as needed. Vacuum the carpet thoroughly. The vacuuming step is often overlooked because it is so labor intensive. Proper vacuuming, however, removes as much as 80% of dry, particulate soil. Vacuuming reduces the probability of wicking during the drying process.
- Apply RTU solution at the rate of 0.5 gallons per 100 square feet of carpet. (2 L per 10 M<sup>2</sup>). Avoid overspray on surfaces not being cleaned.
- Allow adequate dwell time but do not allow the solution to dry on the carpet. If the solution dries, extra time will be necessary to retreat the carpet to dissolve the product residues as well as the soil.
- For best results, use agitation to work the RTU solution into the carpet fibers.
- Rinse extract with 1:64 solution.
- Groom the carpet to align fibers. This improves carpet appearance and reduces drying time.
- Use sufficient airflow to assure that the carpet will dry quickly. The AirPath™ airmover is recommended because of its 360-degree high-velocity airflow.

## CLEANING PROCEDURES – LOW MOISTURE

Follow steps A and B as described above. Use 1:64 RTU solution for the liquid portion of your low moisture system.

## CLEANUP

- Be sure to check for any overspray. Remove these spills promptly.
- Dispose of wastewater any unused product and use solutions properly in accordance with local, state, and Federal regulations. Never dispose wastewater into rivers, streams, or lakes.

## SAFETY CONSIDERATIONS

- Read the Safety Data Sheet (SDSs) for all products before using them.
- Use the personal protective equipment specified in the SDS.
- Follow label directions. Improper use can cause injury or damage to surfaces.
- In case of exposure to the product, call 800-535-5053 for advice.
